

For knowledge and skills in horticulture.

Medicinal Cannabis:

This blended learning course consists of 3 e-learning modules and 4 practical assignments. This course will teach you all you need to know about medicinal cannabis.

Modules:

Module 1 - Introduction: You will learn about the different types and aspects of cannabis plants.

Module 2 - Cultivation: You will learn how to set up your greenhouse for medicinal cannabis and how to cultivate and harvest medicinal cannabis.

Module 3 - Nutrition, shortages, diseases and pest: You will learn about the nutrition and shortages specific for cannabis plants, as well as the diseases and pests they could have.

Practical assignments:

The 4 practical assignments will help you to apply the information that you have learned in the modules to your own practice. A personal instructor will give you guidance through the course, you will get personal feedback to your assignments and you can also send in questions and ask for advice. By entering this course you will get access to the Discussion area, where you can discuss topics with other professionals.

Each module and practical assignment will have a duration of 15-20 minutes. The modules and practical assignments will be available for 6 weeks after payment is completed. After successfully completing all three modules and the practical assignments, you can do an examination (if you wish) and hopefully will receive an accredited certificate.
